

Psyches Genie Digital Signage Media PC

The Ultimate Digital Signage Media PC

Meet Zephy, the digital signage media genie. Zephy makes her home in the ultimate digital signage media PC, **Psyches Genie Media PC**, from Psychsoft. **Psyches Genie Media PC** is a PC based digital signage media control center utilizing high quality components with easy to understand commands that will make all of your digital signage media elements work together with hassle-free ease. For example **Psyches Genie Media PC** can pause, rewind and record live TV utilizing cable, satellite or high definition antenna inputs and overlay crawl text or flash over live input for timely communication with your audience. It can display your targeted content created in flash, mpeg, avi, html, jpg, gif and other formats singly or in multiple zones on your digital signage display. The software that comes with this pc easily manages all your media elements and gives you full creative control in the way you wish to address your target audience. You can be as simple or complex as you want. Digital signage is all about the message, and our goal is to provide you with the most options to deliver that message as quickly and easily as possible without compromising quality along the way, whether in the hardware or the output. That's why we use top of the line GPUs and high end motherboards in our digital signage PCs. You'd expect nothing less from us.

Some of the features of this advanced digital signage media system are:

- Show multiple TV inputs simultaneously on digital signage display
- Show HDTV on digital signage display
- Play flash, mpeg, avi, mp3, html, text, jpg, gif, live feed in multiple partitions on one screen
- TV Tuner Inputs are Cable Ready
- Output digital signage content to TV or Plasma Display
- Output in High Definition
- Output multiple sources on one screen
- Overlay text, crawl, flash on live input
- Accept real time updates to crawl, overlay, flash
- Connect to other devices on your network with 802.11g wireless or gigabit ethernet
- Play PC games on plasma display
- Record TV to Hard Drive
- Record TV to DVD
- Pause, rewind, record live TV
- Designed for continuous use for up to 6 hours in event of power failure with optional UPS for emergency communication in public places
- Utilizes top of the line video graphics cards, TV tuners and high-end components
